PROFESSIONAL SUMMARY

Flutter developer with 6 years of experience building robust mobile and desktop applications, from retail to financial services — currently at Serasa Experian, focused on Server-Driven UI (SDUI). Skilled in scalable architectures (MVVM, Clean Architecture, Modular), state management, and integration with peripheral hardware (thermal printers, barcode scanners). I own the full mobile front end — from architecture to interface — with a focus on performance and maintainability. I also build for Flutter Web (WASM/PWA) and maintain my own portfolio in a monorepo, complete with a design system, internationalization, and Canvas animations (custom painters). Solid background in process automation (RPA) and in inventory and logistics systems.

TECHNICAL SKILLS

Flutter & Mobile

Flutter/Dart (6 yrs) · Android, iOS, Windows, macOS · Flutter Web (WASM/CanvasKit) · PWA

State & UI

Bloc, Provider, GetX, MobX · Material 3, design systems, custom widgets, custom painters · i18n (l10n)

Architecture & patterns

MVVM, MVC, Clean Architecture, Modular · Server-Driven UI (SDUI) · Monorepo (Melos + Pub workspaces), feature-first · SOLID, Clean Code, Design Patterns · go_router

Integrations & data

REST APIs, JSON, HTTP · Hardware: thermal printers, barcode scanners · SQLite, SharedPreferences

Quality & DevOps

Testing: unit, widget, bloc_test · CI/CD: GitLab CI · Git/GitLab · Docker, Docker Compose

Other

Kotlin, Python, Java · RPA: Selenium WebDriver, Airflow · Jasper Reports · Scrum, Kanban

PROFESSIONAL EXPERIENCE

Software Development Analyst — Flutter Mobile — Serasa Experian Jul 2026 – present

- **Server-Driven UI (SDUI):** focus on screens and flows rendered from server-defined contracts, with design system components interpreted in the app.
- Development and maintenance of the mobile app in Flutter/Dart.
- MVVM / Clean Architecture and SOLID principles for maintainable, scalable code.
- Responsive, intuitive interfaces following Material Design.

Software Developer II — Solutis Tecnologias Dec 2025 – Jul 2026 · 9 mos

- Development and maintenance of mobile and desktop applications in Flutter/Dart.
- MVVM / Clean Architecture and SOLID principles for maintainable, scalable code.
- Responsive, intuitive interfaces following Material Design.
- Allocated to Serasa Experian from Apr 2026; hired in-house by the client after 3 months of allocation.

Flutter Developer (Mid-level) — Sumirê Perfumaria Nov 2020 – Nov 2025 · 5 yrs

- **Inventory with hardware integration:** full offline-capable system with label printing via thermal printers (Bluetooth/WiFi), barcode scanning, and data sync between devices and the central system.
- **Logistics & distribution:** route and delivery modules, product tracking, and performance reports.
- **Process automation (RPA):** Selenium and Python routines for repetitive tasks, orchestrated with Airflow.

- **Reporting & analytics:** complex Jasper Reports, KPI dashboards, and export to PDF/Excel/CSV.
- **Technical improvements:** GitLab CI/CD, Docker containerization, and performance/memory optimization.

Main stack: Flutter, Clean Architecture, GitLab CI/CD, Bloc, GetX, Jasper Reports, Python.

FEATURED PROJECTS

Professional portfolio — Flutter Web landing page NEW
Melos + Pub workspaces monorepo with feature-first Clean Architecture and a custom design system (tokens, typography, themes). 11+ custom painters (Canvas animations) and 3 navigable demo apps — investing, delivery, and real estate — each with its own Bloc. Internationalization in 9 languages and a PWA compiled with WASM. Open source on GitHub.
www.zeguidev.com.br

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science
Unisagrado · 2018 – 2022

- Academia do Flutter — official certifications.

ADDITIONAL INFORMATION

- **Languages:** Portuguese (native) · English (proficient — technical reading and documentation).
